Instructions : Each question under this section carries two marks. Please read the following piece of news carefully and answer the questions out of the multiple answers given below each as A, B, C and D.

Abe in Ahmedabad

The symbolism of Japanese Prime Minister Shinzo Abe holding parleys with Prime Minister Narendra Modi in Ahmedabad from today cannot be missed. The last Asian leader who was similarly hosted in Ahmedabad was Chinese President Xi Jinping in 2014. Back then Modi had gone out of his way to fete Xi, but considerable water has flown down the Yangtze Kiang since then. India-China ties haven't proceeded along the expected trajectory, as exemplified by the recent Dhoklam standoff.

Japanese exports to India rose from Rs. 22,900 crore in 2005 to Rs. 57,800 crore in 2015 and as of today about 1305 Japanese companies have branches in India. Japanese investments-both made and proposed – in projects such as the Delhi Metro and the Delhi-Mumbai Industrial Corridor have been or can be transformational. Abe along with Modi will lay the foundation stone for the marquee Rs.1.1 lakh crore Mumbai-Ahmedabad bullet train project which Japan is financing. Understandably, an Indian bullet train has raised eyebrows given the shabby state and unsatisfactory safety record of Indian railways in general. However, it needs to be noted that the bullet train project will have a separate financing stream. Plus, the project can be used as a model to upgrade technology, standards and protocols across the railways.

Additionally, India and Japan will sign 10 MoUs – including those for Japanese industrial parks – during Abe's trip. But what is really grabbing eyeballs is the expected launch of the Asia Africa Growth Corridor. The corridor is meant to build capacity and boost human resource development in Africa, create quality infrastructure, and facilitate people-to-people partnerships. Juxtaposed to China's top-down investments comprising its 'One Belt One Road' initiative, India-Japan's outreach to the continent seeks to connect different growth poles through local ownership of projects, skill development and transfer of technology.

The strategic dimension of the corridor is clear. With China using its huge foreign exchange reserve to acquire economic depth overseas while trying to muscle aside other Asian powers, India and Japan can work together to buttress a multipolar Asia, as well as to provide an alternative model of development for Asia and Africa that respects sovereignty and democratic principles. In that sense, the India-Japan partnership can be a force that transforms the development paradigm in this part of the world. And Modi and Abe have the personal connect to actualise this.

21. How is Narendra Modi, the Prime Minister of India's meeting with the Japanese Prime Minister, Shinzo Abe, in Ahmedabad symbolic ?
- A) The MoU for the first ever Indian Bullet Train between Ahmedabad and Mumbai will be signed on this day of historic meeting.
 - B) Delhi Metro Train has achieved spectacular success with collaboration of the same Japanese Government.
 - C) Japanese investments-both made and proposed – in projects such as the Delhi Metro and the Delhi-Mumbai Industrial Corridor have been or can be highly transformational.
 - D) The last bilateral summit between the then Chinese President, Xi Jinping, and the Indian Prime Minister was held in Ahmedabad in 2004.

- B) The functioning of the Indian railway has been far from satisfactory due to serious unpunctuality in running of trains.
- C) The Indian people are discontented with the disorderliness and lack of safety in the running of Indian trains.
- D) The Indian railway has been highly acclaimed for keeping time and looking after security and comforts of passengers despite the vastness of its net-work.
30. How does the writer defend the Rs.1.1 lakh crore Mumbai-Ahmedabad bullet train project?
- A) The project will be very expensive, uneconomical and increase the loan burden of Indian Government.
- B) The project though expensive will be financed on soft terms by Japan and act as a model for upgradation of technology, standards and functioning of the Indian railways.
- C) If this project becomes successful, the project can be replicated in connecting the other metropolitan cities.
- D) The Indian people dislike the project as the Indian railways have not been able to run the existing trains punctually and safely.
